

LocalFlux AI

Intelligent Design for Modern Businesses

Project Quote

Client: Evelyn González – Expedicargo

Prepared by: Daniel Fornica – LocalFlux AI

Date: October 29, 2025

PROJECT OVERVIEW

A bilingual, fully automated logistics quote platform designed to simplify cargo quoting, automate client workflows, and strengthen Expedicargo's digital presence.

KEY DELIVERABLES

- Responsive bilingual logistics website (EN/ES) with modern UI/UX and blue professional branding.
- Advanced 20+ field Quote Form with dynamic field logic and Supabase + Make.com integration.
- Supabase backend setup with Edge Functions, secure API, and Google Sheets automation.
- Calendly integration for 20-min consultation booking with bilingual support.
- Cargo Insurance field logic with conditional USD input and validation.
- Comprehensive documentation, testing tools, and debug modes for validation.

INVESTMENT SUMMARY

Description	Deliverable	Price (USD)
